KOGELBERG

A CAPE TOWN DAY TOUR

This day tour will take you around the rich coastal habitat east of Cape Town. The rocky slopes along the way hold populations of the endemic Cape Rockjumper as well as Cape Sugarbird, Cape Siskin, Ground Woodpecker and Orange-breasted Sunbird. We will visit the African Penguin colony at Stony Point which, along with close up penguin views, will also provide us with a chance of seeing up to four cormorant species. A visit to the nearby Botanical Gardens will give us an opportunity to look for a variety of local birds such as Forest Canary, Cape Batis and Cape Grassbird as well as a chance for the secretive Victorin's Warbler.

Join us on this popular tour from Cape Town!
