

# FLOCK TO MARION

## Guiding stations

Our team of expert guides will be stationed at various prime viewing sites across the ship throughout each day. The guides will all be easily identifiable with fluorescent yellow vests, and will be announcing sightings using loudhailers and the ship's PA system for notable species.

To help you onto birds, our guides will be using the hours on a clock to signal direction. The bow will be signalled as 12hr, the stern as 6hr, and the lateral sides of the ship as 3hr to starboard or 9hr to port.

**Guiding stations are abbreviated as follows:**

7.1P - Deck 7, Guiding station 1, Port side
